1	I have arranged the paper fitted to the recommended format: Introduction, Literature Review, Research Method, Results, Discussion, Conclusions, and Suggestions for Practical Use. I also restructure the Introduction part by skipping some parts and adding new parts to show art, gap and novelty of my paper. Improvement on the language quality was also done to improve the readability and clarity of the paper.

2	In the Literature Review, a revision was done by rewriting the relevant researches based on their focus of research (thematic). There was also an addition of narration to give a clear explanation on the flow of information. I also attempted to highlight research gap to explain the position of my papers.
3	In the Discussion" section, I have compared my papers results with relevant researches' results to show the advantage of the method I proposed.
4	I tried to restructure my conclusion to be able to portrait the most essential findings of my papers.
