ABSTRACT

Muhammad Fahru Rozi, 2023 *Dirty Jokes spoken in Superhero Comedy Movies Deadpool (Sociolinguistic Approach)*. Thesis. English Letters. Faculty of Cultures and Language.

Advisor: Dr. Kurniawan, M.Hum

Keywords: *Dirty Jokes, Sociolinguistics, Deadpool movies, Jokes, Deadpool*

The film has several genres: horror, superhero, action, and comedy. In comedy, there are various ways to convey humor in a movie, and not only in the comedy genre comedy scenes are used, but sometimes other genres insert comedy scenes in it, such as the superhero film *Deadpool*. In the movie, *Deadpool* uses several jokes, one of which is dirty jokes.

Dirty jokes are jokes that only adults understand because they contain sexual elements in them. In this study, the researcher will explore dirty jokes in the *Deadpool* movie and reveal how the characters deliver their dirty jokes. Therefore, to help the researcher explore Dirty Jokes in the *Deadpool* film, the researcher uses Legman's theory (1968). The researcher uses Davies' theory to reveal how the characters convey dirty jokes (2011).

This study uses qualitative descriptive and data sources from *Deadpool 1* and *Deadpool 2* by collecting data by watching movies, recording dialogues in cinema, and classifying dirty jokes and jokes delivered in *Deadpool 1* and *Deadpool 2* films. After dividing the data into several parts, the researcher gave the code to each piece of data found in the *Deadpool 1* and *Deadpool 2* films.

The researcher found 60 data. The researcher divided the data into two categories, namely stupid and clever, in which in both data, the researcher found that stupid was the type of dirty joke that was most often found. The researcher found the most dominant kind of dirty joke absurd, with 47 data from *Deadpool 1* and *Deadpool 2* films. Meanwhile, the researcher found that straight face was the most dominant data for the method of character delivery of dirty jokes, with 13 data from *Deadpool 1* and *Deadpool 2*.

CHAPTER I

INTRODUCTION

A. Background of The Study

In a language, there are two categories, namely, formal speech and informal language, for dialogue with someone, such as friends, family, and respected people. Based on Andrew (2010), in communication that occurs between individuals in intercultural communication, humor can act as a strong influence in breaking the initially tense atmosphere and creating interpersonal relationships with other people.

Based on Stott (2004), Comedy is the Greek *komoidia*, a word with a complex cultural history. The modern use of Comedy, as opposed to the ancient one, encompasses all types of humor presented formally, whether in script or improv, group or solo, in any medium: theatre, film, television, radio, stand-up, and various hybrids and mutations. From this, It is also, by extension, applied more loosely to novels and other non-show texts that share a plot feature, theme, or tone recognizable to the tradition of comic drama. It is used more loosely as a casual synonym for humor—slapstick comedy, Dad jokes, Dirty jokes. The Tr-Ex.me dictionary defines dirty jokes as dirty jokes, and there are vulgar scenes that will make the audience not stop laughing.

Based on Sacks (1978) defined dirty jokes as jokes that have a dirtiness aspect to them. Dirty jokes can be used as one element in a movie. The reason why Deadpool uses dirty jokes in movies, comics, and the entire series is that Deadpool's characters tend to use vulgar language. Deadpool is a superhero character created by Marvel Comics, later adapted into a big-screen movie in 2016 – 2018.

Deadpool initially told of a mercenary who became the subject of criminal trials, which made him immortal but was injured, thus inflicting revenge on criminals who took revenge. The payback is different and eventually triggers a grudge. A sequel to this Deadpool story was developed from the beginning, which adapted a different story. However, it still maintains the impression of Deadpool, namely the character that seems vulgar, and the action is filled with comedians. Deadpool movies often get good ratings from the movie review website on IMDB Deadpool (2016) movies reached a rating of 8.0, and Deadpool 2 (2018) earned a rating of 7.7.

In addition, Deadpool movies became one of the famous superhero movies since Deadpool movies was a superhero movies with the main character of this movies was a dark hero that fights against crimes based on his reason to revenge his grudge against the scientist who mutated Deadpool to become an immortal human. Still, Deadpool lost his face by being ugly in return for his immortality. This movie also became famous because this is one of the superhero movies that used the comedy genre through its

storyline. However, many superhero movies use comedy elements in it. But, except for the parody of superhero movies, superhero movies do not use many comedy elements in their story, especially since there are still quite a few superhero movies in the characters like to use dirty jokes.

For superhero movies fans, the dirty jokes used by Deadpool in his story become funny because there are rarely superhero movies that use dirty tricks in their comedy, and it's become something new for superhero movies fans that can make a burst of laughter to all of superhero fans audiences. While for the ordinary watcher, the dirty jokes in this movie also can nail the laughter of familiar audiences since the rating of this movie was R-rated movies oriented for adult audiences only.

Thus, the dirty jokes of this movie are nailed to bring laughter for the ordinary watcher since dirty tricks are oriented toward audiences, and only adult audiences know the meaning behind the dirty jokes. Also, the dirty jokes of this movie were supported by the characterization of this movie's characters. In contrast, the characters in this movie tended to use swear words and taboo words towards their opponent in the form of their mockery, or it also could be in the state of the jokes. In Deadpool's characterization, he was described as merch with a mouth that used to babble out toward his opponent. Thus, the dirty tricks in this movie become so funny because it was delivered to the right audiences and also supported by the characterization of the characters of this movie, which tends to use dirty jokes.

For an example of this study, there are scene in *Deadpool* containing dirty joke in it, this is the example of analysis on the dirty jokes that found in *Deadpool* fim :

Figure 1.1 Wade talk to Weasel

Deadpool Movie 1

Screen Time : 18:45

Weasel : I give you a blow job

In this scene it happens when Wade is talking to Weasel at a bar, it happens when Wade becomes *Deadpool*. The punline in these jokes lies in weasel saying *I give you a blow job* to wade, this is a stupid dirty joke type because from the punchline that weasel said can only be understood by wade which wade is an adult and these jokes can only be understood by adults. This dirty joke is of the stupid type because the delivery of this joke is openly without any filtering of taboo words so that when it is delivered in a public place it seems disrespectful. In the presentation of these jokes, it is delivered straight face because when delivering the punchline, weasel with a flat face so that it can add an element of comedy in it.

In order conducting this research there are several previous study, for reflection of this research. The first Research are from Preston (1994) He

discussed about the *“Cinderella” as a Dirty Joke: Gender, Multivocality, and the Polysemic Text*. The second are from Harianto (2018) He discussed about the *Joke Strategies in a Situational Comedy “Friends”*. The third are from Rahmania (2021) He discussed about the *“A Sociolinguistic Analysis Of Taboo Words In Deadpool 2”*. The fourth Sipahutar (2018) He discussed about the *Language Styles in “Love Rosie” Movie: a Sociolinguistic Analysis*. The last are from Harianto (2018) He discussed about the *Joke Strategies In A Situational Comedy “Friends”* .

The thing that distinguishes this study from previous research is that this study discusses dirty jokes in the *Deadpool* film. The similarities in this study with previous research are only on the object being analyzed, namely *Deadpool* and the research approach, namely sociolinguistics. The difference in this study is to discuss the delivery jokes found in the dirty jokes in *Deadpool 1* and *Deadpool 2*. Thus in this study the researcher will be discussing about *”Dirty Jokes spoken in Superhero Comedy Movies Deadpool (Sociolinguistic Approach)”*.

B. Limitation of Study

In this study, focused only on dirty jokes in the *Deadpool* movie sequel. The researcher uses the theory from Legman (1968) about the classification of dirty jokes which is divided into two, namely Clever Dirty Joke and Stupid Dirty Joke. Then, the researcher uses Davies' theory (2011) to explain the role of conversation which has been divided into 8 types, namely, Straight-face, Ironically, Forthright, Disparagingly, Directly, Exuberantly, As yourself, and Linking to someone. These two theories are used as the tool for the researcher to help answer what dirty jokes are found from *Deadpool* Movies?, and how are the character deliver their dirty joke?. This research are limited just in the movie trilogy specifically just take the scene that contain dirty jokes in it, and for comicbook and game are not included as the object that being studied in this research.

C. Formulation of The Problems

From the background of this study, the researcher formulates two research question, that are:

1. What are types of dirty jokes found from superhero comedy movies *Deadpool* ?
2. How do the characters deliver their dirty jokes in superhero comedy movies *Deadpool*?

D. Object of The Study

Based on the above background, the research problem will be formulated with the following questions:

1. To explore the kind of dirty jokes that found from superhero comedy movies *Deadpool*.
2. To describe how the character deliver their dirty joke in superhero comedy movies *Deadpool*.

E. Benefit of The Study

This study aims to determine how dirty jokes are used in *Deadpool* movies, which is expected to be useful for:

1. Theoretical Benefit

Theoretical benefits are benefits related to the development of science, especially in analyzing the dirty jokes of the characters in the perspective of sociolinguistics in the *Deadpool* movie, and can contribute to expanding range of the sociolinguistics research, especially about Dirty Joke.

2. Practical Benefits

In this study, it is a benefit for the author to deepen their knowledge and can provide information for readers about Dirty Jokes. Thus, hopefully, this research can be used as a reflection for the following research who want to start a study about sociolinguistics, especially for the researcher who wants to research dirty jokes or study *the Deadpool* movie.

F. Definition of the Key Terms

For better understanding of this study that discuss about dirty jokes in *Deadpool* movies there are several of the key terms in this study. It can be seen as follow:

1. Sociolinguistics based on by Holmes (1992), study of the relationship between language and society. He explains why speaking differently in different social contexts and he is concerned with identifying the social functions of language and ways of conveying social meaning. In other words, sociolinguistics does not only include what kind of language is used by the speech community, but also includes the relationship between language and society.
2. Dirty Jokes Based on Legman (1968) the dirty jokes make up a large percentage of jokes because people can talk about something as taboo as sex life without taking it too seriously. Whether the conversation sounds funny or not, sometimes the person is funny without realizing it. In short dirty joke are kind of joke that talk about something taboo such as sex

life, and this joke only will be understood by adult people, because this joke used explicit content.

3. *Deadpool* As Dbpedia.org mentioned *Deadpool* is fictional character, that made by Marvel comic. Based on Marvel Comics' most unconventional anti-hero, *Deadpool* tells the story of Wade Wilson, who has been the target of an evil experiment that gives him accelerated healing powers. Armed with his newfound abilities and a dark and twisted sense of humor, *Deadpool* hunts down the man who nearly ruined his life.

LITERATURE REVIEW

A. Sociolinguistics

Sociolinguistics are study of the relationship between language and society based on Holmes (1992). Holmes explains why speaking differently in different social contexts and he is concerned with identifying the social functions of language and ways of conveying social meaning. In addition Wardhaugh (2006), sociolinguistics is concerned with the relationship between language and society with the aim of better understanding the structure of language and the function of language in communication. The equivalent goal in the sociology of language is to find ways to better understand social structures through the study of language. How certain linguistic features work to characterize certain social attitudes.

Sociolinguistics covers several scopes, based on Fishman (1972) he stated that sociolinguistics covers two areas: studies, namely macro sociolinguistics and micro sociolinguistics.

1. Macro-sociolinguistics studies language and its development within society in general. In short, macro- Sociolinguistics includes interactions between groups or large groups of speakers. This research focuses on *Deadpool's* Dirty Joke, which is expressed by the characters in the *Deadpool* movie. Therefore, researcher will use micro sociolinguistics as the approach of this research. All of the theories used in this research are under the scope of micro-sociolinguistics.
2. Micro Linguistics studies how a particular language community affects language in the context of discussion such as behavior, speech acts, recordings, areas of language use, and speaking styles. In short, micro-sociolinguistics involves interaction within a relatively small group or groups of speakers.

For better understanding in sociolinguistics it is important to understanding context. Dell Hymes's (1974) long-term identity of speakers can be proven by producing the language. The context in which the language is used is a factor that influences how the language is used and received. Several decades ago, sociolinguistics developed the SPEAKING model, which characterizes all the different functions of a communication situation and helps contextualize the purely linguistic analysis.

1. Setting and Scene, Setting refers to the time and place in which interaction takes place. Scene refers to a psychological setting; that is, participants' understanding of the type of event that is taking place.

2. Participants is understanding of what sort of event is taking place. Participants, Participants include the speaker and the audience, the latter including the recipient(s) and others present.
3. Ends, Ends refers to the outcome (the assumed goal of an activity or event) and the goal (the goals of the individuals involved).
4. Act Sequence, The different parts of a communicative event are called 'action sequences'. In informal situations (such as arguments leading to conflict) the order may be inappropriate and may not be coherent. This will cause a lot of overlap and interruption and possibly unfinished or interrupted communication.
5. Key, The key to a speech or speech event is determined by the cues that indicate its tone or spirit. Thus, one speaker may indicate through word choice that he or she will be aggressive and uncompromising while another may signal that he is behaving lightly or playfully. Such mismatches can of course lead to — or perpetuate — violations.
6. Instrumentalities, Instrumentality refers to two aspects. One of them is the form and style of speech used by the participants. Another aspect of instrumentality is the channel. Obviously, many other aspects of the context of a situation, and what can and cannot be communicated, are affected by whether the communication takes place face-to-face, via Skype, by conventional written messages or other means.
7. Norms, refers to socially accepted conventions about when people can speak, what things they can say and to whom they can say it. Some

norms, such as how fast someone is expected to speak, relate to general conversation in a community. Regarding more general norms, for example, a person who expects a clear gap after someone speaks before he starts speaking will never get a word when dealing with someone who expects the next speaker to start speaking before he speaks.

8. Genre, Genre is not only used to refer to literary works (poems, novels, etc.) but also to the type of communication that takes place. This can include testimony in court (a kind of co-produced story) but also includes interviews, speeches, jokes, etc.

B. Types of Dirty Jokes

Dirty jokes, based on Kuipers (2006), are the type of joke that just will be understood by adult people. In addition, Legman (1968) states that dirty jokes make up a large percentage of jokes because people can talk about something as taboo as sex life without taking it too seriously. Whether the conversation sounds funny or not, sometimes the person is funny without realizing it. In short dirty jokes are kind of jokes that talk about something taboo, such as sex life, and this joke only will be understood by adult people because this joke uses explicit content. Based on G Legman (2007) Dirty jokes categorized as two kind, that are :

1. Clever dirty joke – This kind of dirty joke is said to be smart, because basically the way this kind of joke is conveyed is by avoiding taboo words that usually have hidden meanings. Like the word rape which refers to changing the words with contextual meaning in them. An

example of a non-sexual word of this same technique is "My Most Embarrassing Moment" which competed for popularity with "Words of a Smart Child (i.e. not suppressed)" in the newspapers, where the anxiety that disappeared had to do with social rather than taboo behavior sexual. In fact, the "Kids' Wise Words" that appear in print are woefully omitted, or pre-selected by parents to be nothing but endearing and cute. The realities of children's lives are very different, and often very frightened and sad, and children's real humor mostly turns to their two main taboo themes: scatology, and attempts to deal with knowledge or suspicions about parental children's sexual relationships.

'Clever' means that all taboo words and graphic descriptions will be avoided in the storytelling, thereby enabling the listener to accept, or (by not laughing or 'not understanding') refusing to accept, certain double-meaning intimacy. Jokes that don't conform to these rules are the opposite of jokes: they're 'stupid'. That is, they are clearly unavoidable, and lacking in deception - verbal rape, as opposed to verbal seduction.

2. Stupid dirty joke – This kind of dirty jokes are opposite with clever dirty joke, where the joke delivered with the clear way, without avoiding the taboo words. In many jokes with themes that are more taboo than simple sexuality, the joke is actually the storyteller himself. which most of the storytellers have their own personal style, not only in grooming and vocabulary, but also in preferred subjects. Many of their stories, or their

favorite stories, are constantly revolving around one taboo theme, such as castration or homosexuality, and it's not hard to see that they, in such stories, allow their conscious or unconscious issues to be socially accepted. Expression path and release pet chicken. Listeners also have their own style: the 'dirty' stories they always crack with laughter, where other kinds of jokes leave them untouchable and often insulting.

Based on the type of the kind dirty joke above that divided by Legman (1968), it used by the researcher for helping the researcher by classifying the type of dirty jokes that researcher found in the *Deadpool* movies.

C. Jokes Delivery

In most movies many genres use jokes as part of it. Movies use jokes to entertain. In this case it is known that jokes are not only about telling, talking, and conveying something to the audience, but also misleading communication that can be a source of laughter, according to (Ross 2005). Misleading or misunderstanding the meaning can be a source of laughter because it can show the stupidity of the speaker and people start to question the futility of their conversation. For some listeners if they know the meaning behind the error, it becomes laughter. So misdirection, misunderstanding, and disconnection can end up being a joke. Jokes are used to make laughs. Laughing and smiling people is the goal of humor.

In this research it is explained that during normal conversation, some people like to entertain others by telling jokes, which are short, funny stories

that end with jokes, according to Martin (2006). It is referred to as a joke to distinguish it from the types of informal jokes and witty jokes that can also be referred to by jokes and jokes. The function of jokes plays an important role in the conversation, According to Davies (2011:5), Jokes can be delivered by:

1. Straight-face, it mean that the audience can laugh with a serious face. If a joke is usually said with a funny face, in this case it's different, it's not going to make a funny face to make the audience burst out laughing.
2. Ironically, it the joke teller satirize certain people or parties and involve them as part of the joke, even part of punchline.
3. Forthright, the storyteller delivered his jokes bluntly without thinking about the next material.
4. Disparagingly, it means that storytellers usually make a punchline with talk that belittles something or someone, and can offend the audience or certain people.
5. Directly, meaning that the joke will delivered directly, or spontaneously, thus made it without chit-chat before the punchline.
6. Exuberantly, this is the opposite of a straight face joke. Joke storyteller will pass on their jokes with cheerful faces.
7. As yourself, it means that the joke storyteller deliver their jokes as themselves.
8. Linking to someone, deliver their joke as they relate it to someone else, thus the joke storytellers act like someone else.

D. Synopsis of the Movie (movie)

Deadpool, one of Marvel's superheroes, is unique because it's slightly different from other superheroes. Unlike other superheroes, who have a good and straight nature, *Deadpool* can be said to be stubborn and often talks dirty. The origin of the name *Deadpool* differs from Spiderman, Superman, or other superheroes whose names are taken from their abilities. The name was *Deadpool* comes from the term gambling. When Wade Wilson and other people are used as experimental weapons x like Wolverine, they will be made a bet on who will survive in a ratio of one to a thousand. The names of the victims of this experiment were collected in one group by the fighters with the character *Deadpool*.

Later on February 12, 2016. *Deadpool* is adapted into a movie produced by Tim Miller and with cast Ryan Reynolds as *Deadpool*, Morena Baccarin as Vanessa, and T.J. Miller as Weasel. This movie tells the story of a man named Wade Wilson. This movie combines the brutal behavior of a superhero with humor. A former military expert who quits his old job. Currently, he prefers to work as a mercenary or mercenary rather than being a guard. Wilson suffers from a chronic illness and is desperate for him. Until he decides to participate in a scientific experiment that promises the power of a superhero. However, the investigation left him in unbearable suffering and pain. Wilson's face was scarred even more by the experiment until he devised a revenge plan for the torment he felt. Then he wears a superhero costume to get revenge on Ajax, who ruins his face. This movie got an R-rating because it is explicitly contained in this movie. Although this movie is an R-rating for the audience, this movie success gained 8.0/10 on IMDB.

Meanwhile, *Deadpool 2* is the sequel to the *Deadpool* movies. This movie was released in 2018 and tells the story of *Deadpool*, who protects a young mutant, Russel, from authorities and gets imprisoned. This sequel introduces dozen of the new character, such as Cable, a mutant who time traveling to get his revenge to russel, who killed his parent, and X-force, the group formed by *Deadpool* to protect Russel. Still, ironically all the members of X-force were killed hilariously, and the main antagonist of this movie was divided into 2. At the start of the film, the main antagonist is Cable. Still, during the middle of the movie, the villain is shifted into an unstoppable mutant juggernaut, and Cable, who was previously the villain of this movie, helps *Deadpool* for stopping the juggernaut and Russel. Identical to the previous film, *Deadpool 2* movie was also rated R because it contains much explicit content. Still, this movie also got a good rating, the same as the last movie, getting a rating of 7.7/10 on IMDB.

This movie from Fox's Marvel depicts Wade Wilson with a unique temperament. On the one hand, Wade has the soul of a hero. On the other hand, he has a sharp mouth and often makes sarcastic sentences. Just like other Superhero movies, *Deadpool's* character has superpowers. He has several powers such as Super healing, Endurance, Super agility, Teleportation, and a Chaotic mind that make him a special character. This *Deadpool* character is unique and different from superhero characters from other Marvel comics. Even though he fights enemies, *Deadpool* is not a superhero but an anti-hero. Superheroes do things for others selflessly, but anti-heroes do it for their reasons.

The object of this research only focuses on the *Deadpool 1* and *Deadpool 2* movies. Therefore it does not include other *Deadpool* trilogies, such as animated comics and games, as research objects. This is because they are

not included in *Deadpool* Cinematic Universe, which in the University has differences with things not included in the *Deadpool* Cinematic Universe discussed in this study. Therefore, the researcher only studied the *Deadpool 1* and *Deadpool 2* movies, more precisely on the dirty jokes expressed by the characters in the *Deadpool 1* and *Deadpool 2* movies.

E. Previous Studies

To prove the originality of this study, the author presents previous researchers who have researched analysis. Researchers have looked at several previous studies to verify the authenticity of the Research. The first Research is from Muharram (2018), entitled “*Analisis Naratif Movie Deadpool.*”

This Research is about narrative analysis in *Deadpool* movies. This Research used the same object that is *Deadpool*, and the subject of study is different from this Research

The second are from Almawan (2017) that entitled “*Sikap Audiens Terhadap Product Placement Crocs Dalam Movie Deadpool*”. This research about the audiens behaviour to product placement on *Deadpool* movies. This research used the same object, that is *Deadpool*.

The third are from Rahmania (2021) that entitled “*A Sociolinguistic Analysis Of Taboo Words In Deadpool 2*”. This research about the taboo words that found in the *Deadpool 2* movie. This research used the same object and topic that covers sociolinguistics analysis in *Deadpool 2* movie.

The fourth Purnamawati (2018) that entitled “*Deadpool Offensive Language Subtitling: A Comparative Fansubs Translation*”. This research

is about language subtitling in offensive word from *Deadpool* movie fan translation. This research used the same object that is *Deadpool*.

The last are from Sri (2016) that entitled "*The Analysis of the Translation Procedures of Swear Words from English to Indonesian as Found in the English-Indonesian Subtitle of Deadpool Movie*". This research about the translation of the swear words found from the *Deadpool* movies. This research used the same object that is *Deadpool*.

The thing that distinguishes this research from previous research is that this study discusses dirty jokes in the *Deadpool* movie, and the similarities between this study and previous research are only on the object being analyzed, namely *Deadpool* and the research approach, namely sociolinguistics. Therefore, the study of "Dirty Joke as Found from *Deadpool* Movie" is interesting to discuss.

CHAPTER III

RESEARCH METHOD

A. Research Design

Qualitative descriptive is a method in which the researcher analyzes based on his perspective by describing the data, and this data is not in the form of numbers. This study examines the Dirty Jokes contained in the sequels of *Deadpool 1* and *Deadpool 2*. In the case of the survey of Dirty Jokes in the sequels of *Deadpool*, qualitative descriptive research is an appropriate method for analyzing the data. Since the data consists of language-based material, such as dialogue and jokes, it cannot be easily quantified or measured using numerical data. Instead, the researcher must rely on their interpretation and analysis of the data to identify patterns, themes, and other essential characteristics. Therefore, the researcher chose the correct method, namely descriptive qualitative methods.

Bogdan and Taylor in Moleong (2007) state that qualitative research is a research procedure based on descriptive facts in the form of written or spoken words and behaviors that exist to be observed. Therefore, descriptive qualitative research matches this research because the data source is the character's conversation and behavior when expressing nature. The data are not in the form of any numbers. By using qualitative descriptive research, the researcher can provide a rich and detailed description of the Dirty Jokes in the sequels of *Deadpool*, including their content, context, and meaning.

This information can be used to gain a deeper understanding of the role of humor in these films, as well as the cultural and social factors that influence the use of dirty jokes in popular media.

B. Data and Source of Data

The data source is an essential component of any research study, as it provides the raw material that the researcher will analyze and interpret. In this research, the data source refers to the subject from which the data was obtained Arikunto (2006). In other words, this research relates to data sources contained in the *Deadpool* film, where the object of this research is the dirty jokes contained in the *Deadpool* film. The researcher will analyze the dialogue, actions, and other elements of the movie to identify the dirty jokes and their context.

It is important to note that the data source can significantly impact the quality and reliability of the research results. In this case, the researcher must ensure that they have access to all relevant data sources, including the original films and any supplementary materials that may be available. The researcher used data sources from the *Deadpool 1* and *Deadpool 2* films as research subjects. The data in this study are dirty jokes expressed by the characters in the *Deadpool* film, which are classified into two types: clever dirty jokes and stupid dirty jokes. The kind of intelligent dirty jokes are in sentences or words to avoid taboo things, and silly dirty jokes refer to frontal penalties. The researcher classified dirty jokes by screen capture

in *Deadpool 1* and *Deadpool 2*, and the researcher classified jokes based on characters in *Deadpool* films.

C. Research Instruments

In qualitative research, the researcher is the main instrument for collecting the data. In addition, based on Stake (2010) stated that in qualitative research, the main instrument is the researcher itself because the researcher conducts all the processes of collecting and analyzing the data. Therefore, to achieve this research, the researcher will watch the movie and write down the screen time and dialog because the researcher is the main instrument for collecting the data. The researcher will use several tools to help the researcher collect data documentation, such as laptops for watching movies and the internet for streaming or downloading movies

D. Data Collection Technique

Data collection techniques refer to the researcher's methods or procedures to gather data from various sources. In qualitative research, the goal of data collection is to obtain rich, detailed, and nuanced data that can be used to answer research questions and develop insights into a particular phenomenon, event, or experience. The researcher used note-taking techniques as a method of data collection, according to Nazir (1998). Note-taking is a system for recording information that includes pages and related information for collecting data. In other words, the researcher took the data with the data recording system in the *Deadpool* film. The researcher does the following steps to collect the data that are:

1. Watching the *Deadpool* movie several times to understand the storyline.
2. Record the dialogue on the characters in the *Deadpool* film and write down the duration of the dirty jokes found in the *Deadpool* film. The researcher, using screen capture as a result of the data.
3. Classify dirty jokes and jokes delivery found in *Deadpool* films.
4. Giving the data codes, that follows:

a. *1/Clv/ I/04:11/Dopinder/Deadpool Movie 1*

b. *2/Stp/F/04:13/Deadpool/Deadpool Movie 1*

1,2 : Datum Number

Clv, Stp : Type Of dirty jokes that divided into (Clever and Stupid)

I, F : How the character deliverr the dilty joke

<i>Deadpool</i> ,Dopinder	: Character who performed dirty joke
<i>Deadpool</i> Movie	: movie where dirty joke appear
04:11,04:13	: duration where the dialogue happened
<i>Deadpool</i>	: Sequel Movies

E. Data Validation

Data validation is used to check the feasibility of the data. Before the researcher starts to analyze the data, it needs validation. Data is one of the important things for this research. According to Creswell (2009), "validity in qualitative research methods that test the accuracy of the data." Accuracy means that the data must be valid to produce significant results. After the researcher collects data from the *Deadpool* movie, the data can be sent to experts or lecturers to get the feasibility of the data. Therefore, the researcher used investigator triangulation, which investigator is based on Patton (2002). To validate the data, the researcher validated the data to Irwan Rohardiyanto, S.S., M.Hum. He is one of the lecturers at UIN Raden Mas Said and an expert in linguistic studies, especially on character analysis in a movie contained in this study

F. Data Analysis Techniques

Data analysis is a method of analyzing data collected systematically. Furthermore, according to Sugiyono (2015), data analysis is the process of systematically searching and compiling data by classifying it, deciding what is relevant and what must be analyzed, then drawing conclusions that can be understood by others. qualitative analysis to analyze the data. Based on

2	<i>Deadpool</i>																	
	2																	

3. Componential analysis

After classifying the data according to each problem formulation, the researcher relates his findings to each question by placing them in a component table.

Table 3. 3 Table of Taxonomy Analysis

		SF	I	F	DIS	DIR	EX	AY	LI	SF	I	F	DIS	DIR	EX	AY	LI

4. Cultural theme analysis

After classifying the data and entering the data into the component table, the researcher looks at the relationship between each domain, connects the most dominant results from the "what" and "how" questions, so that they can draw conclusions from the dominant data by making a narrative.

CHAPTER IV

RESEARCH FINDINGS AND DISCUSSION

In this chapter, the researcher presents the analysis results in detail. C. Discussion

After finishing the research findings, the researcher can conduct the discussion based on each formulation of the problems. In the discussion, the researcher discusses further what has been found in the research findings. But, for explanation is different from the research findings. The result research findings show that there are two types of dirty jokes found in Deadpool movies: stupid dirty jokes and clever dirty jokes. Meanwhile, the way the characters deliver their dirty jokes, the researcher found six forms of the character delivering their dirty jokes, that are straight face, forthright, disparagingly, directly, exuberantly, as yourself. All the data above are collected from the characters' utterances in Deadpool 1 and Deadpool 2 movies. To make it easier to comprehend, below is the componential table of the data collected from Deadpool 1 and Deadpool 2 movies.

Based on what has been found from the first formulation of the problems. As can be seen from the componential table, the researcher found that the most dominant data from the dirty jokes found in Deadpool 1 and Deadpool movies are stupid dirty jokes, with a total amount of data are 47 data, where 20 data comes from Deadpool 1 movie and 22 data comes from Deadpool 2 movie. Meanwhile, the componential table above for the way the characters deliver their dirty jokes shows the result that straight faces are the most dominant way characters deliver their dirty jokes, as in Deadpool 1 with 9 data. In comparison, Deadpool 2 with 18 data and the minor data Dirty Jokes in the Deadpool film is clever with 13 data where 5 data is from the Deadpool 1 film and 8 data from

Deadpool 2. Meanwhile, the most minor data from conveying the character is As yourself in the Deadpool 1 film data. By correlating the most dominant found from each formulation of the problems, it can be known that the characters tend to use stupid dirty jokes with delivering them with a straight face. It can be understood that using a straight face while having stupid jokes can make the comedy feel in the jokes. In contrast, by using a straight face, the character's expression tends to contradict the jokes they say. It can make the audiences not expect the utterances that the characters say as they stay calm while delivering their dirty jokes.

After correlating the two formulations of the problems based on the most dominant data already found, the cultural theme can be concluded. A cultural theme can be finished by correlating the most dominant found from each formulation of the problems. The result found that the most dominant data from the dirty jokes found in Deadpool movies are stupid dirty jokes, and the most dominant from how the characters deliver dirty jokes are straight faces. By correlating the most dominant data, the researcher found that Deadpool is the character that dominant used stupid dirty jokes, having them in straight faces. It can be understandable that Deadpool is the character that wears a mask during his action, and all of the Deadpool tends to be hidden within his act. It also can be understood that Deadpool is the character that tends to throw comedy during his action and the humor he throws not just in the form of his gestural but also in the form of his jokes that come in the middle of his action. It was proven Theo Dwyer, on the website Bleedingcool (2020), states that the characterization of

Deadpool in the comics and films is depicted as a character that is funny, loud, vulgar, and badass. This can be seen in his behavior when acting against his enemy. Therefore, based on the explanation before, it can be known that Deadpool is a character that loves to joke with his friend or his foe during his middle action; usually, he uses dirty jokes for his friend to show his friends that he is teasing his friends, while for his foe, he usually throws the dirty jokes as showing his anger to his enemies as part of the insult towards his enemies. Therefore, the way of Deadpool for throwing dirty jokes at his friends and his enemies is different in showing his emotion towards them. For superheroes movies fans, the dirty jokes used by Deadpool in its story become funny because there are rarely superhero movies that use dirty jokes in their comedy, and it becomes something new for superheroes movies fans that can make laughter to all of the superhero fans' audiences. While for ordinary watchers, the dirty jokes in these movies also can nail the laughter of familiar audiences since the rating of this movie was R-rated movies oriented for adult audiences only.

Thus, the dirty jokes of this movie are nailed to bring laughter for the ordinary watcher since dirty jokes are oriented toward audiences, and only adult audiences know the meaning behind the dirty jokes. Also, the dirty jokes of this movie were supported by the characterization of this movie's characters. In contrast, the characters in this movie tended to use swear words and taboo words towards their opponent in the form of their mockery, or it also could be in the form of jokes. Especially in Deadpool's characterization, he was described as merch with a mouth that used to babble out towards his opponent. Thus, the dirty

jokes in this movie become so funny because they were delivered to the right audiences and were supported by the characterization of the movie characters who tend to use dirty jokes. Based on this study's problem formulation, the research results show detailed results, which can be seen in the table below.

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

A. CONCLUSIONS

In this last chapter, the researcher concludes. Conclusions can be made based on the results of Chapter 4, which has answered the formulation of the problem. Based on Chapter 4, the researcher found 50 pieces of data, and all of the data was divided into several categories to answer each formulation of the problem. From the 60 data that has been described in chapter 4, several conclusions have been drawn, the conclusions are:

1. From the first formulation of the problem, namely What are the types of dirty jokes found from Deadpool Movies? based on Legman (1968) categorizing dirty jokes into two, namely stupid and clever. Based on chapter 4 the researcher divides the data into two categories, namely stupid and clever, in both data the researcher finds that stupid is the type of dirty jokes that is most often found and for the character who often utters these types of dirty jokes is Deadpool where Deadpool is more often using dirty jokes of stupid type instead of clever.

2. From the first formulation of the problem, namely How do the characters deliver their dirty jokes? Based on Davies (2011) he divides how the characters convey the jokes where he divides into straight face, ironically, forthright, disparagingly, directly, exuberantly, as himself, linking to someone. From these findings the researcher found that straight face was the most dominant way the characters delivered the jokes and for the most dominant characters who used straight face the researcher found that Deadpool was the most dominant character using it.
3. The last, to conclude this research, the researcher create cultural themes. Where, cultural themes can be made based on the most dominant findings based on each category that has been explained from chapter 4. Based on chapter 4, the researcher found that the most dominant type of dirty jokes was stupid with a total of 42 data found from the Deadpool 1 and Deadpool 2 movies. Meanwhile, for the way the character of delivering dirty jokes, the researcher found that straight face is the most dominant data with a total of 28 data from the movies Deadpool 1 and Deadpool 2. By combining the two data, the researcher found that the most dominant character uses dirty jokes by means of stragth is Deadpool. That can be seen from the characterization of Deadpool where, Deadpool is the type of superhero who likes to joke around with his friends and opponents. Where he uses dirty jokes to his friends as a form of teasing while for his opponents he uses dirty jokes as a form of

insult and his way of joking is unusual but also uses dirty jokes which are often spoken in frontal and Deadpool tends to use straight face because he is described as a superhero wearing a mask so , by using this mask, the expression of Deadpool tends to be invisible when he utters his dirty jokes and sometimes, utters his dirty jokes suddenly without expression as a form of presenting his comedy.

B. SUGGESTIONS

In comedy-themed films, as well as other themes, sometimes insert several comedy scenes with humor and dirty jokes as one of them. Adult viewers can understand the joke by inserting dirty jokes in these scenes. They can cause laughter because dirty jokes are those that only adults can understand. After all, they contain sexual content in them, either directly or indirectly. Using dirty jokes in literary works can add comedy elements that can be understood, especially by adults. By researching the field of linguistics, using dirty jokes in films can reduce the tension in the movie, so inserting them can create comedy in them.

For future researchers, this study can be used as a reference for studying dirty jokes from a linguistic approach, especially for researchers who use the same theory. The researcher suggests that the next researcher analyze the DC Universe film where, in this study, the researcher only examines Deadpool as the object of his research, where Deadpool is one of Marvel's superhero characters. By comparing the dirty jokes in the DC

Universe with Marvel, you can see the difference in the use of dirty jokes.

Therefore, this research can be a reference for further study.
